

ASX ANNOUNCEMENT

10 February 2020

ASX: G1A

ABRA PLANT EPC CONTRACT AWARDED

GALENA MINING LTD. (“Galena” or the “Company”) (**ASX: G1A**) announces that Abra Mining Pty Limited (“**AMPL**”), the joint-venture company for the Abra Base Metals Project (“**Abra**” or the “**Project**”) has awarded an engineering, procurement and construction (“**EPC**”) contract to GR Engineering Services Limited (“**GRES**”) for the supply of a 1.2 million tonne per annum lead sulphide flotation process plant and ancillary infrastructure.

Managing Director, Alex Molyneux commented, *“I am pleased we have been able to retain GRES, which has the most relevant experience and understanding of our project, on terms that are in-line with our Feasibility Study estimates.”*

The EPC contract is in the form of a guaranteed maximum price (“**GMP**”) contract in the value of approximately A\$74 million, with a sharing of cost savings between GRES and AMPL below the GMP level.

GRES (ASX: GNG) is a leading Australian engineering and contracting company that specializes in providing high quality engineering design and construction services to the mining and mineral processing industries. GRES was the EPC contractor in some of Australia’s most successful sulphide base metals projects, including Nova Nickel (for Sirius Resources NL, acquired by Independence Group NL), Deflector (for Doray Minerals Ltd) and Rasp Mine (for CBH Resources Ltd). GRES has extensive knowledge of Abra, having been involved in the outstanding Feasibility Study completed in July 2019.

Certain components of the EPC works, up to a capped exposure level have already commenced. However, the main EPC contract remains conditional on financial close on the proposed project financing debt facilities.

The Board of Directors of Galena authorized this announcement for release to the market.

Forward-looking statements

The contents of this announcement reflect various technical and economic conditions at the time of writing. Given the nature of the resources industry, these conditions can change significantly over relatively short periods of time. Consequently, actual results may vary from those in this announcement.

Some statements in this announcement regarding estimates or future events are forward-looking statements. They include indications of, and guidance on, future earnings, cash flow, costs and financial performance. Forward-looking statements include, but are not limited to, statements preceded by words such as “planned”, “expected”, “projected”, “estimated”, “may”, “Scheduled”, “intends”, “anticipates”, “believes”, “potential”, “predict”, “foresee”, “proposed”, “aim”, “target”, “opportunity”, “could”, “nominal”, “conceptual” and similar expressions.

Forward-looking statements, opinions and estimates included in this announcement are based on assumptions and contingencies which are subject to change without notice, as are statements about market and industry trends, which are based on interpretations of current market conditions. Forward-looking statements are provided as a general guide only and should not be relied on as guarantee of future performance. Forward-looking statement may be affected by a range of variables that could cause actual results to differ from estimated results and may cause the Company’s actual performance and financial results in future periods to materially differ from any projections of future performance or results expressed or implied by such forward-looking statements. So there can be no assurance that actual outcomes will not materially differ from these forward-looking statements.

About Abra Base Metals Project

86.16% owned by Galena, the Abra Base Metals Project (“**Abra**” or the “**Project**”) is a globally significant lead-silver project located in the Gascoyne region of Western Australia (between the towns of Newman and Meekatharra, approximately 110 kilometres from Sandfire’s DeGrussa Project).

Galena completed an outstanding definitive / bankable feasibility study (“**FS**”) (see *Galena ASX announcement of 22 July 2019*) for development of a mine and processing facility with a 16-year life producing a high-value, high-grade lead-silver concentrate containing approximately 95kt of lead and 805koz of silver per year after ramp-up. Based on a pre-development capital expenditure estimate of A\$170 million, the FS modelled a pre-tax net present value for Abra (at an 8% discount rate) of A\$553 million and an internal rate of return of 39%.¹

Note: 1. Information relating to the production target and financial information derived from the production target is extracted from the ASX announcement of 22 July 2019. Galena confirms that that all material assumptions underpinning the production target, or forecast financial information derived from a production target, in that announcement continue to apply and have not materially changed.

Abra JORC Mineral Resource estimate^{1, 2}

Resource classification	Tonnes (Mt)	Lead grade (%)	Silver grade (g/t)
Measured	-	-	-
Indicated	16.7	8.5	24
Inferred	24.4	6.5	14
Total	41.1	7.3	18

Notes: 1. See Galena ASX announcement of 17 October 2019. Galena confirms that it not aware of any new information or data that materially affects the information included in Galena's ASX announcement of 17 October 2018 and confirms that all material assumptions and technical parameters underpinning the resource estimates continue to apply and have not materially changed. 2. Calculated using ordinary kriging method and a 5.0% lead cut-off grade. Tonnages are rounded to the nearest 100,000t, lead grades to one decimal place and silver to the nearest gram. Rounding errors may occur when using the above figures.
